The cable part of the line will be operated by a stationary engine. Hope the line will be extended to Verde Valley.

A cattle buyer informs The Sun that beef cattle are in good demand and showing good prices. The demand for feeders is limited owing to the high price and scarcity of corn in Kansas and Nebraska. The following from the St. John's Herald will apply equally as well to Flagstaff: "There is a class of citizens in St. John's which we think come within the operation of the yagrum act. The class referred to is composed of a shiftless set of people who do not work, and when men come to town who do work, this trifling set make it a point to beg borrow or borrow money out of them. We witnessed one of this non-working class quarreling with and actually abusing a laboring man last Saturday evening, who had come to town to have a little recreation and a brief rest from the labors of the day. This class of people who have no visible means of support, and who prey upon worthy, industrious people should be looked after by the authorities.

Eugene Whipple of Creston, Iowa, a son of J. C. Whipple of this place, has invented a car coupler which the railroad commissioners of that state say has three points of advantage over any other coupler in use. The coupler is built on the O. B. & Q. railroad. It is simple and accurate in its operation and can be operated either from the top or side of the car. It is fully six inches shorter than other couplers, and shortens the length of a train of thirty cars more than fifteen feet. We hope that Mr. Whipple will realize the full benefit of his invention.

TWO HANDSOME GIRLS.

Newport is to have a sensation this summer.

It is authentically stated that the beautiful and celebrated daughters of Lord Dufferin, Beatrice and Adelaide, are to grace this famous resort with their presence this season. It will be remembered that Beatrice's beautiful dark eyes have played havoc with the heart of Asquith, the eldest son of the Prince of Wales. What it will amount to is as yet a matter of conjecture in England. The young ladies are acknowledged to be the most beautiful in all Europe, and there will be no little excitement in the hearts of our American boys over their coming. They are exquisite dressers, and their costumes will be marvels of coquetry. Unlike most ladies they know exactly what is suited to them. Some time ago they sent for the chief designer of the Paris house of the New York and Paris Young Ladies Fashion Bazar two of their most exquisite costumes, which appear as figures 3 and 4 in the colored plates of the June number of this magazine, just out, and for which the publisher has issued, in the name of the American ladies, a card of thanks. It is rumored that the prince may follow the young ladies to Newport this summer. The New York and Paris Young Ladies Fashion Bazar has the exclusive right to publish each month at least one more of the costumes in which the ladies Beatrice and Adelaide will appear.

Everything known that at this season the blood is filled with impurities, the accumulation of months of close confinement in poorly ventilated rooms, workshops and tenements. All these impurities and every trace of scurvy, indigestion, or other unctions may be expelled by taking Hood's Sarsaparilla, the only medicine which "lets down the digital."
